PROFESSIONAL SUMMARY

Full-stack software engineer with ~5 years of experience building scalable web applications and internal platforms. Strong background in React, backend APIs, and cloud systems, with production features used by hundreds of users across distributed teams.

WORK EXPERIENCE

Software Engineer 2, Amazon (Gurugram)

Oct'24-Present

Lumina AI – EV Charging Network

- Built and shipped an AI-driven monitoring dashboard providing real-time visibility into EV charger health across **200+ sites** in Europe, used by **500+ users**.
- Designed backend services to fetch and process charger data, enabling automated fault detection and reset workflows.
- Implemented a scalable React frontend with authenticated access and production-grade deployments.
- Provisioned cloud infrastructure using infrastructure-as-code, supporting beta and production environments.

Quartz (LLM-based Internal Chatbot)

- Migrated the chatbot UI from Python Panel to React, improving scalability and enabling faster UI iteration through a modular component-based architecture.
- Built reusable React components with centralized state management and secure, authenticated API access.
- Extended UI capabilities to support structured outputs (tables) and designed the foundation for future visualizations.

Notch (Notification Dispatch Platform)

- Built a React-based frontend to replace bulk email workflows with targeted, filter-driven notifications for field teams.
- Integrated API-driven, multi-dimensional filters and implemented a flexible query builder supporting AND/OR/NOT logic for precise recipient selection.
- Improved message relevance and reduced notification noise through a cleaner, filter-first user experience.

Software Engineer, Amazon (Gurugram)

Nov'22-Oct'24

Polaris (Project & Budget Planning Tool)

- Took ownership of a large internal planning tool used by **2,000+ daily users**, modernizing a legacy HTML/CSS/JS codebase with reusable components and cleaner abstractions.
- Built core workflows including request intake, approval flows, monthly tracking, and completion reporting for project and budget planning.
- Implemented bulk data import/export capabilities to support large-scale financial data management and reporting.

Other Projects:

- Lessons Learnt Portal: Built a retrospective tracking tool that reduced recurring operational issues by **25%** by capturing and sharing key learnings across peak events.
- Page 0 Portal: Developed a reporting platform for weekly, monthly and quarterly business reporting processes, cutting admin time by **40%** and boosting data accuracy by **50%** for Amazon RME teams.

Fullstack Development Engineer, Finscience Technologies Pvt. Ltd., (Bengaluru)

Jun'22-Nov'22

- Designed and built an internal dashboard with role-based access control using React, Node.js, and MySQL, improving data access and internal workflows.
- Implemented RESTful APIs and data validation to improve backend reliability and reduce development time by **40%**.
- Delivered responsive, pixel-accurate UIs from Figma/Zeplin designs and integrated a payment gateway for production use.

INTERNSHIP EXPERIENCE

Fullstack Development Intern, Subzclick Pvt. Ltd., (Remote)

Dec'20-May'21

- Built and deployed a responsive landing page within 5 days, increasing website traffic by **30%** and user engagement by **25%**.
- Implemented backend services using Node.js, Express, and MongoDB to support web and mobile applications.

Other Internships, (Ved World Pvt. Ltd. & Across the Globe)

Jan'20-Dec'20

- Built frontend features for an e-commerce platform using React.
- Created browser extension automations that reduced manual operational work by **90%**.

SKILLS

Languages: JavaScript, TypeScript, Python, C++

Frontend: React, React Native, HTML/CSS

Backend: Node.js, Express, REST APIs, MongoDB, DynamoDB

Cloud: AWS (Lambda, API Gateway, Cognito, S3)

Tools: Git, Postman, Figma

ACHIEVEMENTS

- Winner, Smart India Hackathon 2020, for a technology-driven problem-solving project.
- Published a research paper on Soil Health Monitoring System; secured runner-up position at Tech Savvy'19.

EDUCATION

Jaypee Institute of Information Technology, Sector-62, Noida

2018-2022

B. Tech in Electronics and Communication Engineering (8 CGPA)

VOLUNTEER

- Taught Python to 120+ students as a member of IEEE student chapter.
- Core organizing member for college technical and cultural events, contributing to outreach and coordination.
